

KineticoPRO Product Differentiators

- Made in The USA
- Thoroughly vetted and deployed by water aficionado's such as:
 - Pepsi
 - Coke
 - McDonalds
 - Wendy's
 - Many more

- Eliminates taste and odors.
- Longest filter life available.
- Lowest cost per 1,000 gallons.
- Extremely simple installation, (in most cases we can provide recommended and experienced installers for lower 48 states).
- Unlimited water on demand.
- Lowest pressure drop of all competing technologies which enables the highest flow rates available.
- Modular and customizable for unique water chemistry and contaminants.
- Offering the widest range of applications including drinking water, beverage water, steamers, ice machine applications and more.
- Largest total capacity per unit volume available.
- No electricity, drain, expensive membranes nor storage tank required, unlike Reverse Osmosis technology.
- Removes up to 99.999% of Chlorine, PFAS, Carcinogens, Cysts, Cryptosporidium, heavy metals, THM's, herbicide's, pesticides, much more.
- Mitigates hard water problems.
- No maintenance required.
 - No added salt nor other chemicals required.
 - No expensive membranes to foul and replace.

- WIFI enabled manifolds available for self-monitoring, reporting of system health and advance notification of cartridge replacements. This includes an optional total care and service program, meaning truly zero maintenance available for the life of your systems.
